SRG FIT — Client App Guide

Welcome to SRG Fit 💪

This guide walks you through everything you need to know to get the most out of your coaching experience. The app is designed to be simple — but there's a lot of power under the hood once you know where to look.

📋 Table of Contents

1. Logging In & Setting Up
2. Home Tab — Your Daily Hub
3. Logging a Workout
4. Swapping an Exercise
5. Morning Pulse Check-In
6. Nutrition Tracking
7. Messaging Your Coach
8. Progress Tab
9. Resources & Guides
10. Goals & Milestones

---

1. Logging In & Setting Up

After receiving your invite email, tap the link to set your password. You'll land directly in the app — no app store download needed. SRG Fit runs right in your browser.

To install it on your phone home screen:

📱 **iPhone (Safari)**

1. Open srgfit.app in Safari
2. Tap the Share button at the bottom of the screen
3. Scroll down and tap "Add to Home Screen"
4. Tap Add — the SRG Fit icon will appear on your home screen

🤖 **Android (Chrome)**

1. Open srgfit.app in Chrome
2. Tap the three-dot menu in the top right
3. Tap "Add to Home Screen" or "Install App"
4. Tap Add — done!

---

2. Home Tab — Your Daily Hub

The Home tab is your mission control. Everything you need for the day lives here, from top to bottom:

🏆 **Recent Wins** — Shows your most recent PR or streak milestone. It stays up for a few days so you can celebrate it before it slides into the community feed.

🎯 **Goals** — Active goals for your lifts, or suggestions to start with if you haven't set any yet. Tap one to edit it or add a new one.

📅 **Today's Workout** — Your scheduled workout for today. Shows the exercise count and a "Start Workout" button. If you've already completed it, it shows a green "Workout Completed" card.

💡 **Coach Review** — If your coach has left a video review on a completed workout, it appears here as a card you can tap to watch.

✅ **Daily Habits** — Your habits and coach tasks for today. Mark them off as you go. Tap the edit button to add or remove habits.

🌅 **Morning Pulse** — Your daily check-in for sleep, energy, and mood. Takes about 5 seconds.

> 💡 **Tip**
>
> The Home tab refreshes automatically. After completing a workout, your streak card will update and any new PRs will appear right away.

---

3. Logging a Workout

Tap **Start Workout** on your Home tab to open today's session.

The Workout Flow

> ⚠️ **Left mid-workout?**
>
> No problem — your progress is saved automatically. Tap the workout from the Home tab to resume exactly where you left off. All your logged sets will still be there.

---

4. Swapping an Exercise

Sometimes an exercise doesn't work — wrong equipment, discomfort, or just not feeling it. Every exercise has a **Swap** button.

> 💡 **Tip**
>
> Swaps are tracked and visible to your coach. They use swap data to improve your programming over time — so always log the reason honestly.

You can also **Skip** an exercise entirely by tapping Skip and selecting a reason. Skipped exercises are noted in your session summary.

---

5. Morning Pulse Check-In

The Morning Pulse is a quick daily check-in that takes about 15 seconds. Your coach uses this data to understand how you're recovering and adjust your programming.

[redacted]

📊 **See Your Trends**

Head to the Metrics tab to see 30/60/90-day charts of your sleep, energy, and mood over time. Patterns become visible over weeks — your coach uses these to spot when life stress is affecting your training.

---

6. Nutrition Tracking

Tap the **Nutrition** tab in the bottom nav to log your food.

Your daily targets are set by your coach and shown as a progress bar at the top of the Nutrition tab. Protein, carbs, fat, and calories each fill as you log meals throughout the day.

> 💡 **Tip**
>
> Consistency beats perfection. Logging 80% of the time gives your coach enough data to make good calls. Don't stress about tracking every single bite — just get the big meals in.

---

7. Messaging Your Coach

Tap **Messages** in the bottom nav to open your conversation with Coach Shane.

📢 Broadcast Messages

Occasionally your coach will send a message to all clients — check-ins, motivation, announcements. These appear in your message thread like a normal message.

---

8. Progress Tab

Tap **Metrics** in the bottom nav to track your physical progress over time.

📊 **Charts** — Toggle between Weight, Body Fat, Waist, Measurements, Chest, Shoulders, Hips, Arms, Thighs, and Calves.

Log Metrics — Tap the add button on any chart to enter weight, body fat, and measurements. Date defaults to today and can be changed.

📸 **Progress Photos** — Tap **Add Photo** to upload a progress photo. Select the angle (Front, Side, Back), add a date, and optionally a caption and weight. Photos are private — only you can see your own.

Compare Photos — Once you have 2+ photos, tap **Compare Photos** to view side-by-side comparisons. Pick any two photos and drag the slider to see changes over time.

🌙 **Dark Theme** — Toggle dark mode in the top-right corner. Easier on the eyes during early morning or late night sessions.

> 💡 **Tip**
>
> Take progress photos on the same day each week, same lighting, same time of day. Morning after waking up is ideal. Consistency in the photo conditions makes the comparison much more meaningful.

---

9. Resources & Guides

Tap **Resources** in the bottom nav to access everything your coach has shared with you.

Icon	Type	What it is
📄	Article	Written guide or blog post
▶️	Video	Instructional video
📑	PDF	Downloadable document
📘	Guide	Step-by-step walkthrough
🔗	Link	External resource
💪	Workout	Bonus workout with exercise list

Search — Use the search bar at the top to find any resource by title, description, or tag.

Add to My Day — Workout resources have an "Add to My Day" button that adds the session to your calendar.

---

10. Goals & Milestones

Your Goals

Goals are set by your coach and visible on the Home tab as progress bars. There are three types:

🏋️ **Strength Goals** — Tracks your best lift for a specific exercise. Example: "Squat 225 lbs." The bar fills as you log heavier sets. Hit a new PR and it fills the bar and celebrates.

⚖️ **Bodyweight Goals** — Tracks your logged weight in the Fitness tab. Example: "Get to 185 lbs." The bar shows your weight and the gap remaining.

🔥 **Consistency Goals** — Tracks how many workouts you've completed. Example: "Complete 20 workouts." Every workout you log moves the bar toward the target.

Suggest a Goal — See something you want to work toward? Tap **+ Suggest a goal to your coach** at the bottom of the goals section. Your coach will review it and can activate it.

Milestones & PRs

Every time you hit a new personal record, a celebration appears. Your coach can also send you custom milestones — a specific lift, a weight target, or a consistency goal. Your coach sees your milestones and can send you new ones.

Recent Wins

🏆 Recent wins appear on the Home tab and celebrate your most recent achievements. Tap the trophy icon to see the full history. Your coach sees the same wins.

Need Help?

Your coach is always one message away.

- **Messages** — fastest way to reach Coach Shane
- **Call Request** — for anything that needs a conversation
- **Email** — shane@srgfit.training
